Projects

Work-Link | Node.js, Express.js, MongoDB, JavaScript

Live | GitHub

- Built a full-stack MERN job marketplace connecting blue-collar workers with relevant local job opportunities, enabling employers to post jobs and workers to discover and apply.
- Implemented role-based authentication and RESTful APIs to manage job postings, applications, and core workflows end-to-end.
- Designed MongoDB-based data models to support scalable job listing, discovery, and application management.

Personal Portfolio | React.js, Tailwind CSS, JavaScript

Live | GitHub

- Built a responsive developer portfolio in React.js and Tailwind CSS to showcase projects, skills, and education.
- Implemented a dark/light theme-switching system using Shadcn UI components for a consistent, accessible interface.
- Used CSS-based animations to present content sections with a polished, professional feel.

Indore House Price Prediction Platform | Python, FastAPI, MLflow, Docker

Live | GitHub

- Built an ML-powered web app estimating property prices across diverse Indore localities based on locality, area, BHK, floor, and furnishing status.
- Trained a Random Forest Regression model on a 4,545-row dataset covering 140+ localities, served through a FastAPI inference API.
- Productionized the model with MLflow for experiment tracking and Docker for containerized deployment.
